FAIL LCP request discovery

Optimize LCP by making the LCP image discoverable from the HTML immediately, and avoiding lazy-loading

FAIL Network dependency tree

Avoid chaining critical requests by reducing the length of chains, reducing the download size of resources, or deferring the download of unnecessary resources to improve page load.

FAIL Reduce unused CSS **~22.4 KB savings**

Est savings of 22 KiB

Reduce unused rules from stylesheets and defer CSS not used for above-the-fold content to decrease bytes consumed by network activity. Learn how to reduce unused CSS.

URL	Transfer Size	Est Savings
<code>https://dragoncandy.io/assets/index-B_TbmXh0.css</code>	24.5 KB	22.4 KB

FAIL Reduce unused JavaScript **~110.9 KB savings**

Est savings of 111 KiB

Reduce unused JavaScript and defer loading scripts until they are required to decrease bytes consumed by network activity. Learn how to reduce unused JavaScript.

URL	Transfer Size	Est Savings
<code>https://dragoncandy.io/assets/index-Bs5qwSTX.js</code>	100.4 KB	63.6 KB
<code>https://dragoncandy.io/assets/vendor-motion-D9irQEn5.js</code>	41.5 KB	25.2 KB
<code>https://dragoncandy.io/assets/vendor-supabase-tvB9dFZN.js</code>	30.4 KB	22.1 KB

NEEDS IMPROVEMENT (2)

WARN Render blocking requests

Requests are blocking the page's initial render, which may delay LCP. Deferring or inlining can move these network requests out of the critical path.

URL	Transfer Size	Duration
<code>https://dragoncandy.io/assets/index-B_Tb</code>	25.3 KB	147 ms

WARN Image elements do not have explicit `width` and `height`

Set an explicit width and height on image elements to reduce layout shifts and improve CLS. Learn how to set image dimensions

Accessibility 96

These checks highlight opportunities to improve the accessibility of your web app. Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so manual testing is also encouraged.

FAILED (1)

FAIL Background and foreground colors do not have a sufficient contrast ratio.

weight 7

Low-contrast text is difficult or impossible for many users to read. Learn how to provide sufficient color contrast.

Failing Elements

```
<button class="inline-flex items-center justify-center gap-2 whitespace-nowrap text-base ...">
<button class="inline-flex items-center justify-center gap-2 whitespace-nowrap ring-offse...">
<button class="inline-flex items-center justify-center gap-2 whitespace-nowrap ring-offse...">
<button class="inline-flex items-center justify-center gap-2 whitespace-nowrap ring-offse...">
<button class="inline-flex items-center justify-center gap-2 whitespace-nowrap ring-offse...">

Benchmark index	638
Lighthouse	13.0.1

Recommendations

Concrete fixes for the issues surfaced above. Items are ordered by impact on the failing metrics for this run.

- Strip ~110.9 KB of unused JavaScript** — biggest contributors are the main bundle, `vendor-motion`, and `vendor-supabase`. Use route-level `React.lazy` for every page (already done for most), add `manualChunks` in Vite to isolate framer-motion/recharts, and remove unused npm deps (`install`, `embla-carousel-react`, `sharp`).
- Strip ~22.4 KB of unused CSS** — Tailwind already purges unused classes via `content` in `tailwind.config.ts`. Confirm no global CSS files are loaded that aren't used (`src/App.css`, `src/index.css`).
- Add explicit dimensions to images** — every `<img>` should have `width` and `height` attributes (or `aspect-ratio` CSS) so the browser can reserve space and avoid layout shift.
- React Query tuning** — set `refetchOnWindowFocus: false` globally on the QueryClient and override per-query for live data. Replace `refetchInterval` polling on payments/applications with Supabase Realtime `postgres_changes` subscriptions.
- Lock in this score** — add a CI check (Lighthouse CI) that fails the PR if Performance drops below 92 or LCP regresses by more than 200 ms.
