

Pingdom Performance Report

URL: https://dragoncandy.io/
Run: 2026-05-02T13:30:05.129153Z
Page id: https://dragoncandy.io/

Headline Metrics

1.88 s ONLOAD	4.97 s FULLY LOADED	8 REQUESTS	140.6 KB BODY SIZE
------------------	------------------------	---------------	-----------------------

Detailed Timings

562 ms TTFB (REQUEST → RESPONSE)
42 ms DNS LOOKUP
13 ms TCP CONNECT
12 ms SSL HANDSHAKE
562 ms REQUEST
1 ms RESPONSE
1.88 s DOMCONTENTLOADED
627 ms DOM INTERACTIVE
1.88 s DOM COMPLETE
0 ms LOAD EVENT

Resource Breakdown

Type	Requests	Body size	% of body
script	2	109.0 KB	78%
stylesheet	2	25.9 KB	18%
image	3	4.1 KB	3%
document	1	1.7 KB	1%

Request Waterfall (all 8 requests)

#	Status	Method	Type	Total	Body	DNS	Connect	SSL	Send	Wait	Receive	URL
1	200	GET	text/html	631 ms	1.7 KB	42 ms	14 ms	12 ms	0 ms	563 ms	1 ms	https://dragoncandy.io/
2	200	GET	text/css	70 ms	1.1 KB	1 ms	23 ms	22 ms	0 ms	22 ms	0 ms	https://fonts.googleapis.com/css2?family=Outfit:wght@400;500;600;700;800&family=Pacifico&display=swap
3	200	GET	text/javascript	512 ms	8.3 KB	0 ms	0 ms	0 ms	0 ms	511 ms	1 ms	https://dragoncandy.io/~flock.js
4	200	GET	text/css	677 ms	24.7 KB	0 ms	0 ms	0 ms	0 ms	675 ms	1 ms	https://dragoncandy.io/assets/index-B_TbmXh0.css
5	200	GET	text/javascript	686 ms	100.7 KB	0 ms	0 ms	0 ms	0 ms	683 ms	3 ms	https://dragoncandy.io/assets/index-Bs5qwSTX.js
6	200	GET	image/png	556 ms	2.3 KB	0 ms	0 ms	0 ms	0 ms	555 ms	0 ms	https://dragoncandy.io/icons/icon-32.png
7	200	GET	image/png	1.25 s	909 B	0 ms	0 ms	0 ms	0 ms	1.25 s	0 ms	https://dragoncandy.io/icons/icon-16.png
8	200	GET	image/vnd.microsoft.icon	1.29 s	970 B	0 ms	0 ms	0 ms	0 ms	1.29 s	0 ms	https://dragoncandy.io/favicon.ico

Per-request Headers

Each request's full request and response headers.

► 1. GET https://dragoncandy.io/ — 200

► 2. GET https://fonts.googleapis.com/css2?family=Outfit:wght@400;500;600;700;800&family=Pacifico&display=swap — 200

- ▶ 3. GET <https://dragoncandy.io/~flock.js> — 200
- ▶ 4. GET https://dragoncandy.io/assets/index-B_TbmXhO.css — 200
- ▶ 5. GET <https://dragoncandy.io/assets/index-Bs5qwSTX.js> — 200
- ▶ 6. GET <https://dragoncandy.io/icons/icon-32.png> — 200
- ▶ 7. GET <https://dragoncandy.io/icons/icon-16.png> — 200
- ▶ 8. GET <https://dragoncandy.io/favicon.ico> — 200

Recommendations

Specific actions based on the timings, payload, and request waterfall above.

1. **TTFB is 562 ms** — investigate the origin response time. Lovable hosting plus a Supabase round-trip on the root document will be the dominant contributor; consider adding a CDN edge cache for the static `index.html`.
2. **onLoad is 1.88 s** — main blockers are the JS bundle (`index-Bs5qwSTX.js` at 100 KB and `vendor-react`) and CSS. Lazy-load route code with `React.lazy` for every page (already done for most), inline critical CSS, and async-load Google Fonts.
3. **Fully loaded is 4.97 s** — the long tail is third-party fetches (Google Fonts, Supabase auth) and image requests. Preconnect to required origins and self-host fonts.
4. **2 slow request(s)** (>800 ms) — investigate: `icon-16.png` , `favicon.ico` . Likely waterfall caused by sequential discovery; preload them with `<link rel="preload">` if they're on the LCP path.
5. **Set up monitoring** — Pingdom is a one-shot read. Track these numbers continuously by enabling Lovable's built-in performance metrics or a free synthetic monitor (e.g. Cloudflare Speed, SpeedCurve, or DebugBear) so regressions surface within hours, not weeks.
6. **Cross-reference with Lighthouse mobile** — Pingdom runs on a fast desktop network. The mobile Lighthouse run (LCP 4.5 s) is the truer story for most users on 4G. Optimize for the worse number.
